BOOK SYNOPSIS

This manual is not meant to be considered as a complete presentation of the Romanian accounting standards or a comprehensive identification of all the differences and specific features that might arise during any kind of field work, but as an analysis and explanation of the main characteristics that can be met and which commonly appear in the first approaches with the Romanian country system. This manual is intended as a guide for all those professionals already working in accounting/finance & business analysis and related matters, not focusing on main fundamental notions but only in specific concepts of Romanian accounting standards (henceforth RO GAAPs). This handbook aims to carry out an analysis of the features which emerge from RO GAAP accounting, carrying out any digressions and links with the Romanian tax rules and where appropriate, the Italian reporting standards (henceforth ITA GAAP) International reporting standards (IFRS) and English reporting standards (henceforth UK GAAP).
